## General

### Dip Coater RDC 15 with Stepper Motor Control

This machine is the successor of the approved gear motor driven RDC 15 and was developed to meet the demand for a greater variety of speeds and settings. It is mainly used for laboratory dip coating of modern liquid photoresists. Today a more and more popular application is also so called: "sol-gel-application". For a even higher variety of speed settings, we offer also a new type RDC 21 with stepper motor drive (see details below).

#### Features:

- Lift bar for several workpiece fittings. The dipping height and the sizes of the aluminium profiles can be easily adapted to even dip-coat bulky items.
- The dip coater is working with constant dipping speed. This speed is adjustable between 30 - 10.010 mm/min. The drawing speed determines the thickness of the coating. This speed is as well adjustable from 30 - 10.010 mm/min.
- The dipping time as well as the drip-off-time (pause time up and down) is separately adjustable from 0 s bis 99 h:59 min.:59 s. This enables the machine not only to coat but also to precisely develop. This is of great importance with certain photo coatings of the miniature etching technology.
- Up to 9 iterations are possible.
- Universal power supply enables to work the RDC worldwide with all power systems.
- The working range of the lift bar can be adjusted via the control panel. The maximum size of the workpiece is therefore only limited by the maximum lift range of the machine and the size of your cuvette.
- On request we built machines according to your specification. Especially the stroke length is easily adaptable.

## Technical Data

<b>Stroke length</b>	0 - 650 mm
<b>Maximum load:</b>	1,5 kg (reduced max. speed with maximum load)
<b>Weight:</b>	12 kg
<b>Dimensions (BxWxH):</b>	330 x 465 x 965 mm
<b>Insertion speed:</b>	Programmable from 30-10.010 mm/min
<b>Drawing speed:</b>	Programmable from 30-10.010 mm/min
<b>Dipping Time:</b>	0 s bis 99 h:59 min.:59 s
<b>Drip Off Time:</b>	0 s bis 99 h:59 min.:59 s
<b>Iterations</b>	Up to 9-times
<b>Power supply:</b>	100-240 V 50-60 Hz 120 w

## EG- Declaration of Conformity

### EG-Konformitätserklärung/Declaration of Conformity

Hersteller / Supplier:

Product:

Tauchbeschichter RDC15  
Dip Coater RDC15

Hiermit erklären wir, dass die oben beschriebenen Maschinen allen einschlägigen Bestimmungen der Maschinenrichtlinie 2006/42/EG entspricht.

Die oben genannte Maschine erfüllt die Anforderungen der nachfolgend genannten Richtlinien und Normen:

We hereby declare that the machines described above complies with all relevant provisions of the Machinery Directive 2006/42/EC.

The above machine meets the requirements of the following guidelines and standards:

- **Maschinenrichtlinie 2006/42/EG / Machinery Directive 2006/42/EC**
- **EMV-Richtlinie 2014/30/EG / EMC Directive 2014/10830EC**
- **Niederspannungsrichtlinie 2014/35/EG / Low Voltage Directive 2014/35/EC**

• **DIN EN 60204-1** Sicherheit von Maschinen - Elektrische Ausrüstung von Maschinen - Teil 1: Allgemeine Anforderungen / Safety of machinery - Electrical equipment of machines - Part 1: General requirements

• **DIN EN ISO 14121-1** Sicherheit von Maschinen - Risikobeurteilung - Teil 1: Leitsätze / Safety of machinery - Risk assessment - Part 1: Principles

• **DIN EN ISO 12100-1** Sicherheit von Maschinen - Allgemeine Gestaltungsleitsätze, Risikobeurteilung und Risikominde rung / Safety of machinery - Basic concepts, risk assessment and risk reduction

• **DIN EN 55014-1 2012-05** Elektromagnetische Verträglichkeit, Anforderungen an Haushaltsgeräte, Elektrowerkzeuge und ähnliche Elektrogeräte, Teil 1: Störaussendung / Electromagnetic compatibility Requirements for household appliances, electric tools and similar electrical appliances Part 1: Emission

• **DIN EN 55014-2-2009-06** Elektromagnetische Verträglichkeit - Anforderungen an Haushaltgeräte, Elektrowerkzeuge und ähnliche Geräte - Teil 2: Störfestigkeit - / Electromagnetic compatibility - Requirements for household appliances, electric tools and similar apparatus - Part 2: Immunity

• **Maschinenrichtlinie / Machinery Directive 2006/42/EG/37/EG**

Windeck, 10.1.2021

Jürgen Bungard Geschäftsführer

## Intended Use

The machines are designed for coating positive and negative photoresists and solder masks as well as other paints or SolGel liquids.

All other applications require our written consent or are at full risk of the user. Bungard GmbH & Co. KG assumes no liability whatsoever for any damage that may result from the use of the machine.

## Safety Regulations

### General

Read all the safety instructions and all the operating instructions thoroughly before using the unit for the first time.

Keep these safety instructions and operating instructions somewhere safe in case you need to refer to them again in the future.

The machine is designed for use in the laboratory and shall be operated only by qualified staff. Also the unit should be repaired by qualified staff only. Never try to do more in the way of maintenance to your unit than the operating instructions allow. Beyond that, always consult an expert for repair work.

The machines are not intended for the integration or interconnection with other machines or systems. They may only be used in specially equipped rooms and be operated by qualified personnel. Children and pets must be kept away!

The general safety regulations for handling electrical equipment need to be observed.

### Transport

Only use suitable lifting and transport equipment such as forklifts or pallet lifts. Secure the machine against sliding / tilting. Danger of damage!

### Place of installation

The machine must be level and must have sufficient space around the machine for operation and maintenance (approx 1m on all sides).

Do not place the unit in a location near heat sources such as radiators, hot air ducts, furnace, and the like.

### Electrical

The machine is manufactured using tested components according to standard practice for electrical safety. This does not release the user from his duty of care when handling electrically powered devices.

Connect the device only to the power source indicated in the operating instructions or on the device. We assume a house-side fuse for the power source. The connection to the power supply may only be performed by a specialist.

After completion of the work, the main switch should always be turned off.

Before any work on the machine (cleaning, etc.) and when not in use switch off the machine and unplug it.

### Cleaning

When cleaning the appliance, keep yourself to the manufacturer's recommendations.

### Operation safety

Protect from moisture. Protect from falling

Do not engage the toothed belt while the machine is running.

Important: The machine may only be loaded when the operating voltage is switched on, otherwise there will be no holding moment for the motors and the boom will run downwards. The max. Load is 1.0 kg at max. Speed.

## Setup

Examine the machine for possible transport damages. If you encounter any problems inform us and the carrier immediately.

Carefully transport the machine to its operation site. Do not use the motor or other extending parts as a handle.

Strip off the packing. Make sure not to damage the tooth belt.

Connect to power supply.

## Operating

After switching on the operating voltage, the LCD briefly shows a welcome screen, followed by the input prompt:

Important: All your parameters are saved even after switching off the machine, and are available, when you switch on the machine again until you overwrite the parameters.

The only exception is the travel depth, which must be re-determined for safety reasons during each reference drive.

Comment	Display
After switching on: <u>Welcome Screen with Software-Version</u>	Bungard BEL RDC 21-k version xx-xx-xx
Prompt to drive to home position.	drive home position start press green
Drive to the upper end switch. If you do not want to start the dip process from the upper end switch, e.g. if the substrate is small and the dipping vessel is low, you can always set a virtual end switch during the home position drive to the upper end switch. All dives will then start from this virtual end position. You can delete the virtual end position by turning off the machine or by a new reference run.	Home position wait for end switch user home position press yellow button
After arriving at the home-position you are prompted to start a reference drive.	Reference drive start press green
If you do not want the dive to go to the lower end switch (probably the general case), you can stop the drive at any time by pressing the yellow button. This can only be done while the machine is moving down.	Max. travel distance wait for end switch user defined dist. press yellow button

<p>After that you reach the main menu. There you can change settings for the dip (edit), start the last dip (auto) or make a reference run again.</p> <p>If your home position is too high and you want to change it, you can either start a dipping process and switch off the machine when the lever-arm is lower than the desired home position. Or switch off the machine directly, move the lever arm in an unpowered state (Caution! Self induction of the motor!) slowly below the desired position, switch the unit on again and interrupt the travel to the upper end switch at the desired home position.</p>	<b>Main menu</b> edit   auto        home grn   red   blk   yel
<p>With the Edit-Mode you can adjust speeds (velocity), pause times and iterations. If you press the yellow button you get always back the next higher level.</p>	<b>Edit mode</b> veloc   time   iter   esc grn   red   blk   yel
<p>You can adjust different speeds for the dip (down) and the coating (up) drive.</p>	<b>velocity</b> V.up   Vdown        esc grn   red   blk   yel
<p>You can adjust the speed for the dip drive between 0 and 999. This speed is a virtual value. The correspondance table at the end of this manual gives you the relation between this virtual speed to the speed in mm per minute.</p>	<b>Velocity up</b> speed up: _ _ _ up   down   ok   esc grn   red   blk   yel
<p>The same is valid for the coating drive.</p>	<b>Velocity down</b> speed down: _ _ _ up   down   ok   esc grn   red   blk   yel
<p>You can adjust different pause times for the upper and lower end position.</p>	<b>Pause time menu</b> t. up   t. down        esc grn   red   blk   yel
<p>For the pause time in the upper end position, time can be set between 00:00:00 and 99:59:59.            (27.1.17: You can set up to 99 minutes and 99 seconds by means of a programming error, so the first minute will be 99 seconds and the first hour will be 99 minutes.) Please enter only a maximum of 59 for minutes and seconds and we will fix the error as soon as possible)</p>	<b>Pause time up</b> time: _ _ : _ _ : _ _ up   down   ok   esc grn   red   blk   yel
<p>The same is valid for the lower end position.</p>	<b>Pause time down</b> time: _ _ : _ _ : _ _ up   down   ok   esc grn   red   blk   yel
<p>In the Iteration menu you can adjust between 1 and 9 iterations</p>	<b>Iteration menu</b> iterations: _ up   down   ok   esc grn   red   blk   yel
<p>Back in the main menu you can go to the automatic program by pressing the red button.</p>	<b>Main menu</b> edit   auto        home grn   red   blk   yel
<p>Pressing green will start the dip drive.</p>	<b>Automatic mode</b> start             esc grn   red   blk   yel
<p>During the dipping cycle the active function with the set parameters is shown.</p>	<b>Drive down</b> speed stage: _ _ _
<p>The timer counts down the set time and shows the active iteration.</p>	<b>Timer</b> _ _ : _ _ : _ _ iteration: _

	Drive up speed stage: ___
	Timer ___ : ___ : ___ iteration: ___
At the end the machine announces the end of cycle and with pressing green you go back the main menu.	Job complete OK press green
	Main menu  edit   auto   ___   home grn   red   blk   yel

If the machine does not reach the upper end position (e.g. because of overload), the message **no home-position** is displayed. In this case, please reduce the weight of the probe.

## Loading

Important: the motor holds the lift bar only when the power supply is switched on. Mount items only to the holder when the power is on. Otherwise the lift bar will move downwards. The maximum load is 1.0 kg at maximum speed.

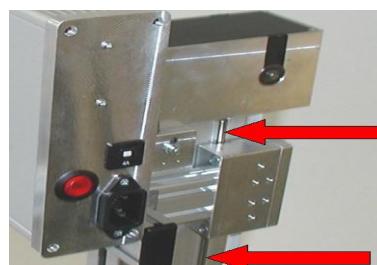

The machine is equipped with a universal lift bar.

Inserted in the bar you will find a couple of special nuts M5. You can fix your dipping items with screws and clamp sheets to these nuts.

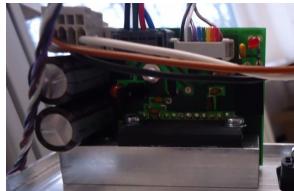

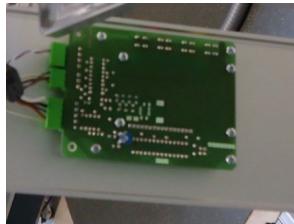

## Maintenance

The machine is mostly maintenance free. We only recommend to grease once a week the driving rails with a non corrosive oil (e.g. sewing machine oil).

## Guarantee

All machines are submitted before distribution to examination on function and continuous operation firmness. On the machine we grant a work warranty of 12 months to our customers starting from purchase date on accuracy in material and processing. We warrant at our choice by exchange of incorrect parts or by repair of the machine in our house. Old parts change into our possession.

## Disclaimer of Warranty

Bungard GmbH & Co.KG reserves the right to change or enhance its machines or machine specifications according to its judgement, if necessary. Bungard cannot be held responsible to implement aforesaid changes into machines sold already.

Bungard products and services are liable to the current prices and conditions, which are subject to change.

The instructions and definitions in this document are also subject to change and mark no assurance on the part of Bungard.

This manual contains informations of the Bungard RDC15 and is the translated English version.

Please regard the "Sales terms and delivery conditions". These are available after fulfilment of the contract. We don't furnish a guarantee or warranty in cause of damages at material or hurts of people because of

- Incorrect use of the machine
- Wrong setup, installing and operating of the machine or incapable service
- Use of the machine with defective safety equipment
- Non-observance of the service manual in regard to transport, stocking, setup, installation and service of the machine
- Unlicensed modifications at the machine
- Incorrect or incomplete repairs
- Destructive force effect at the machine in cause of foreign objects or external use of force
- Use of non-original spare parts
- normal wear parts.

We cannot accept subsequent claims from damage or destruction of work pieces worked on in the machine, because we have no knowledge or control over the operating conditions at your site. This is valid in a general manner also for requirements from damage to articles, buildings and persons as well as the environment.

We do not warrant that the function of the machine will meet the customer's requirements or that the operation of the machine will to this regard be error free.

In no event will we be liable to the customer for any incidental, consequential, or indirect damages of any kind, including loss of profit and prosecution for environmental pollution, even if we could have been aware of the possibility of such damages.

All information was arranged with great care. We reserve ourselves however mistake and technical changes without previous announcement.

Running the machine in corrodng, humid, dusty, extremely hot or explosive atmosphere happens at the operator's own risk and responsibility.

We explicitly exclude any warranty for damages resulting from running the machine in in corrodng, humid, dusty, extremely hot or explosive atmosphere.

## Correspondence Table for Coating or Dipping Drive

You can set different speeds for dipping and for coating drive between 0 and 999. This speed is a virtual quantity. The allocation table on the next page provides information on the corresponding speeds in mm / min.

Alternatively, you can set the set speed by the formula:

Speed = Display value x 10 + 20.

Correspondingly, you can calculate the display value by subtracting from the desired speed in mm / min 20mm / min and dividing the result by 10.

For example, if your photo coat supplier recommends a coating speed of **350** mm / min, you set in the display the value  $(350 - 20) / 10 = 33$ .

Stufe	mm/ Minute	Stufe	mm/ Minute	Stufe	mm/ Minute	Stufe	mm/ Minute	Stufe	mm/ Minute	Stufe	mm/ Minute	Stufe	mm/ Minute	Stufe	mm/ Minute	Stufe	mm/ Minute	Stufe	mm/ Minute
